Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall track grant fund allocations,	High	Pass: Balance updates accurately and blocks expenses exceeding grant cap; Fail: Overdraft allowed without admin override.	Core grant functionality
FR-002	Functional	The system shall allow faculty to log equipment procurement expenses, and compute remaining budgetary balance.	Medium	Pass: Records stored in database successfully. Fail: Records not being stored, corrupt, or unreadable.	Required for budget tracking
FR-003	Functional	Co-author approval portal	Medium	Pass: Users can consent to co-author with each other. Fail: Users being able to co-author with anyone without consent.	Boosts productivity
FR-004	Functional	The system shall allow faculty to submit research grant applications and required supporting documents.	High	Pass: Application and documents are submitted and stored successfully. Fail: Incomplete applications cannot be submitted.	Required to manage grant applications.
FR-005	Functional	The system shall allow authorized users to record and track publication details associated with faculty research projects.	Medium	Pass: Publication details are saved and linked to the appropriate research project. Fail: Unauthorized users cannot modify publication records.	Supports research output tracking.
NFR-001	Non-Functional	The system shall maintain an immutable, tamper-evident audit ledger for all financial approvals and journal status modifications.	Low	Pass: Benchmarking tests confirm target latency and security standards under simulated peak load.	Improves fraud protection
NFR-002	Non-Functional	The system shall protect grant and publication records from unauthorized access.	High	Pass: Users can access only records permitted by their role. Fail: Unauthorized access attempts are denied and logged.	Ensures confidentiality and data security.

Faculty Research Grant and Publication Tracker
Grant Provision
Expense Tracking
Immutable ledger
Faculty Researcher
Faculty Dean

Use case flow

Step ID	Actor	Action	Notes
BF-1	User	The user signs in with university provided credentials	
BF-2	System	The system authenticates the user and allows access to the portal	
BF-3	User	User sends a co-author request to another user	
BF-4	System	Presents the request to the other user	
BF-5	User 2	Approves request	User can deny also, go to AF-1 then
BF-6	System	Adds a co-author record	
BF-7	User	Sees that the request is approved	

Alternate flow

Step ID	Actor	Action	Notes
AF-1	User	The user can send another co-author request or exit the application	
AF-2	System	Return to BF-4 or exit
